Gabriele Cavigiolo - tech speaker, talks and presentations | Eventitech

Senior Cloud Architect, Solution Architect and Tech Project Manager with experience in designing, modernizing and migrating application and infrastructure architectures to hybrid cloud environments, especially Azure and AWS. I combine solution architecture, cloud governance, FinOps, DevOps, CI/CD and AIOps expertise with technical coordination, project management capabilities and a solid backend foundation: PHP, Python, Node.js and C# are used as enablers to understand code, accelerate integration, support automation and make collaboration with development and AMS teams more effective.

Top Tech Skills

AWS & Azure Hybrid architectures, cost management, cloud services and enterprise application migrations.	Solution Architect End-to-end solution design, AMS team support, security assessments, roadmaps and alignment between business and technology.	Cloud Governance & FinOps Technical governance, cost control, operating models and support for project decision-making.
Azure DevOps Pipelines, repositories, boards, automation and support for standardizing delivery with a focus on quality and reliability.	CI/CD Build, test and release processes focused on quality, traceability and risk reduction.	Backend Languages PHP, Python, Node.js and C# used as enablers for integration, automation and prototyping.
AIOps AI-driven practices supporting observability, incident analysis, operational automation and continuous improvement.		

“Durable Skills”

I consider myself a responsible professional with a strong sense of project ownership: I care deeply about the projects I follow, their evolution, quality and impact, and I take responsibility for operational and technical decisions in a conscious way. I approach accountability with confidence, pragmatism, attention to detail and a strong problem-solving mindset.

Professional Experience

Senior Cloud Architect, Cloud Competence Lead — Orbyta Tech S.r.l. / IVECO GROUP S.p.A.
January 2025 – Present | Turin | Full-time consulting in hybrid work mode

The consulting engagement with IVECO started on 13 January 2025 and is still ongoing, through several renewals made possible by the demonstrated competence, reliability and quality of the work delivered.

Since the first months, I have taken ownership of projects independently, after an onboarding period to acquire methods and procedures.

- Ongoing consulting within the IVECO GROUP Cloud Competence Center.
- Design and management of CI/CD processes and standardization for cloud delivery through Azure DevOps.
- Project management of application migrations from on-premises environments to the cloud, with Tech Project Manager responsibility for planning, technical coordination and activity progress.
- Definition of hybrid cloud architectures on Azure and AWS for new initiatives.
- End-to-end ownership as Solution Architect: assessment, solution design, technical governance, cost estimates and support to the project owner.
- Interface with business and technical stakeholders to align application requirements, infrastructure constraints and delivery objectives.

Senior Cloud Architect, Solution Architect and Senior Backend Developer — Synesthesia S.r.l.

June 2018 – November 2024 | Turin | Full time with smart working

- Design and implementation of cloud infrastructures mainly on AWS and Azure.
- Support for structured projects integrating backend, cloud and DevOps capabilities.
- Implementation of CI/CD pipelines, automation and IaC components when required by the project.
- Experience with container orchestration, serverless architecture and SaaS backends with REST and GraphQL APIs.
- Teaching activity at ITS ICT Piemonte on containers, microservices, serverless, Azure Functions, AWS Lambda and Node.js.

IT Delivery and New Projects Manager — Smmartpost S.r.l.

June 2017 – June 2018 | Villanova di Castenaso

- Responsibility for the IT department dedicated to the delivery and digital services business unit.
- Coordination of technical and operational resources, managing workflows, priorities and procedures.
- Collaboration with key accounts and enterprise and public administration customers.
- Supervision of digital services, web-to-print, public administration e-invoicing, e-commerce, web and mobile applications, parcel lockers and geomapping.

Tech Leader & Senior Developer — Postitaly S.r.l. / Craftybit

July 2014 – May 2017 | Turin

- Management of the company IT structure and coordination of R&D groups.
- Analysis, design, development and documentation of digital services.
- Design and development of core architectural components for applications.
- Technical responsibility for the BlueBox project, a system for automating mail acquisition, later selected for distribution by Pitney Bowes.
- Support for planning the Craftybit IT spin-off and distribution certification projects.

Previous Experience

2008 – 2014 | Turin and Moncalieri

- Partner and developer at Binamic S.N.C., working on project management, analysis, design and software development.
- Analyst developer at Digiform S.r.l. and CSL srl, focused on maintenance, enhancements, customer requirements and production processes.
- Collaborations and internship at WebWorking S.r.l., with full-stack activities, application maintenance, PHP development and web project management.
- Service in the Italian Army as volunteer corporal on a one-year fixed-term enlistment, with excellent evaluation.

Education and Training

- **2022 – 2025:** Lecturer at ITS ICT Piemonte — Containers and microservices, serverless, Cloud Specialist track.
- **2012 – Present:** Continuous training on AWS, Azure and, in recent years, AI.
- **2018:** Training on DevOps and Agile.
- **2012:** Specific training in parcel and delivery processes with EU regulations.
- **2007 – 2010:** Bachelor's degree in Communication Sciences, New Media Technologies track, thesis "Object-oriented PHP programming", final grade 103/110.
- **2000 – 2005:** Technical high school diploma, Istituto G. Ferraris, Vercelli, final grade 93/100.

Languages

- **English:** fluent written and spoken, technology- and business-oriented; Euroformazione Difesa certificate.
- **French:** elementary written and spoken.
- **Spanish:** elementary spoken.
- **Portuguese:** currently studying.

Soft Skills and Professional Approach

Good relationship-building skills with customers, stakeholders and colleagues, including in complex or high-pressure contexts. Team-oriented attitude, especially in Agile and Scrum models. Strong focus on problem solving, critical issue analysis and the identification of sustainable operational solutions.

Personal Details

- Born in Vercelli on 24/11/1986
- Resident in Pecetto Torinese since 2015
- Driving licence and own car
